

Vaccine Research Center Seminar Series

Spring 2010

Tuesdays at 4 pm: Building 40 (VRC), Room 1203

3/2	Jaap Goudsmit Crucell	<i>Novel conserved influenza virus epitopes recognized by human neutralizing antibodies</i>
3/9	Cristian Apetrei Univ. of Pittsburgh	<i>Episode VI: Return of the SIVsmm</i>
4/6	Jason Brenchley NIAID / NIH	<i>Mechanisms underlying differential outcomes in primate immunodeficiency lentiviral infections</i>
4/13	Joanne Flynn Univ. of Pittsburgh	<i>Latent Tuberculosis: What's going on in there?</i>
4/20	Shane Crotty La Jolla Inst. Allergy & Immun.	<i>Follicular helper CD4 T cell (Tfh) differentiation and function</i>
4/27	George Pavlakis NCI / NIH	<i>Improving DNA vaccines</i>
5/4	Jake Estes NCI / NIH	<i>The first 100 days: setting the stage for AIDS</i>
5/11	David Artis Univ. of Pennsylvania	<i>Mechanisms of immune surveillance at mucosal sites</i>
5/18	Michael Rossman Purdue University	<i>Flaviviruses and Alphaviruses: a comparison of their structure and function</i>
5/25	Brandon Keele NCI / NIH	<i>Viral transmission and early evolution: implications for vaccine design</i>
6/1	Michael Zwick Scripps Research Inst.	<i>Envelope glycoprotein spike instability and heterogeneity on isolates of HIV</i>
6/8	Tom Hope Northwestern University	<i>Mucous is sticky business: interactions of HIV, antibodies and the cervical mucous</i>
6/22	Pamela Bjorkman CalTech	<i>How HIV evades antibody avidity and what we can do about it</i>
6/29	Bob Siliciano Johns Hopkins University	<i>HIV Pharmacodynamics: Implications for Vaccine Design</i>

For more information, please see <http://vrc.nih.gov/cgi-shl/vrc/seminars.cfm>. Please subscribe to the VRC Seminar EMail listserv to receive up-to-date information including cancellations or schedule changes: see <http://list.nih.gov/archives/vrcseminar.html>. Contact Mario Roederer (301-594-8491 or Roederer@nih.gov) for other information.
